Market Outlook

At the meeting held on the 17th of June 2021, the Monetary Policy Committee opted to maintain the Bank Rate at 3.75%, choosing to remain accommodative despite inflation having breached the upper bound of the BoB's medium term objective range of 3-6%. Inflation risk remains on the upside following a further increase in fuel prices post quarter end and the July riots in South Africa. Unrest and riots in South Africa, Botswana's main trading partner is to result in some import inflation as a widespread shortage of goods and resources is expected once the dust settles.
